

**Pre-Registration Pharmacist Passport**

Pre reg pharmacist:

Tutor:

This document should be used as a transfer of information between rotations to allow supervisors to know the level at which a pre reg is working. To be shown to rotation lead at the start of each rotation and reviewed/signed at each end of rotation appraisal. Clinical objectives are separate for each rotation.

	To be completed by	Date	Signature of supervisor / tutor
Stores logs (250 items)	14/9		
Dispensing (200 items)	14/9		
CD dispensing (50 items)	End Dec		
POD check logs (50 items)	End 1 <sup>st</sup> clinical rotation		
Drug history logs (20 patients)	End 1 <sup>st</sup> clinical rotation		
Medicines reconciliation logs (20 patients)	End 2 <sup>nd</sup> clinical rotation		
IDM accuracy log (100 items)	End 2 <sup>nd</sup> clinical rotation		
Checking logs (500 prescriptions)	End May		
Counselling logs (50 items)	End May		
Validating logs (100 prescriptions)	End June		
Intervention logs	Ongoing		

**Ward work**

All work must be supervised and countersigned by a pharmacist.

Induction required for each ward area to cover variance in practice.

Pre reg must be able to explain indication, ADRs, pharmacology and side effects of commonly used medicines by the end of the rotation as stated in the rotation objectives. Pre reg must be familiar with policies and guidelines for each area as stated in the rotation objectives.

	Date	Signature of supervisor
Pre reg is able to read and interpret NEWS charts and observation charts		
Pre reg is able to endorse prescription charts with additional instructions		
Pre reg is able to access ICE and follow up on patient lab results. To be able to discuss the results and relate to prescribed therapy		
Pre reg is able to calculate creatinine clearance using Cockcroft and Gault formula and is aware of its limitations		
Pre reg is able to routinely check for drug interactions		
Pre reg is able to perform transcription checks		
Pre reg is able to read and interpret medical notes (all abbreviations must be looked up)		
Pre reg is able to prioritise orders for the ward		
Pre reg is able to explain their patients pharmaceutical issues to the ward pharmacist		
Pre reg able to validate and process TTOs with only a final sign off by pharmacist		
Pre reg is able to cover one bay of patients (4-6 patients)*		
Pre reg is able to cover two bays of patients (8-12 patients)*		
Pre reg is able to cover three bays of patients (16-20 patients)*		
Pre reg is able to cover a whole ward*		
Pre reg has observed and supported pharmacist to complete one ward CD check		
Pre reg has observed and supported pharmacist to complete CD returns / destruction of ward stock and patients own CDs		

\*for integrated medicine, surgery and cardiovascular rotations. For specialist rotations nearer the end of the year we would not expect pre reg to cover this level of patients (NSIC, Paediatrics).

**Communication**

	Date	Signature of supervisor
Pre reg is able to communicate effectively with nurses		
Pre reg is able to contact the medical team to make interventions (under supervision of pharmacist)		

**Work place based assessments**

Mini-Cex and MRCF should be completed by pre-reg's tutor, CBDs can be completed by appropriate senior/specialist

	Date completed	Signature of supervisor / tutor	Date completed	Signature of supervisor / tutor	Date completed	Signature of supervisor / tutor
Mini Cex						
CBD						
MRCF (obtain pt feedback if can)						
Ward visit with EPD						
Complete extended intervention						
Complete CPPE consultation skills pack						

**Additional suggested shadow opportunities**

During the second half of the pre reg year you can arrange some of these additional opportunities that interest you. You can only have the time to do these additional shadows if you are progressing satisfactorily with your rotation objectives.  
You will need to co-ordinate these experiences with your rotations leads.

	Contact	Date	Signature of supervisor
Shadow a ward nurse for a morning (any area)			
Theatre visit (during surgery rotation)			
Shadow Pain team (during surgery rotation)			
Stoma nurses (during surgery rotation)			
Attend a microbiology ward round (during integrated medicine rotation)			
Diabetic nurse round (during integrated medicine or surgery rotation)			
IBD nurse (during medicine rotation)
