Development***

Course Catalogue 2026/27

Contents

Meet the Team

Foreword

What is Continuing Professional Development (CPD)

Who is eligible for CPD funding

CPD opportunities and how to apply

Bloods

- Introduction to Phlebotomy
- Managing blood results in Primary Care
- Understanding Blood Results for Physiotherapists
- Understanding Blood Results
- Interpreting Blood Results

Cancer

- Cancer
- Cancer Care

Cardiac

- Advancing coronary heart disease (CHD) care
- Advancing heart failure care
- Arrhythmia interpretation and management
- Atrial fibrillation
- Cardiac disease: prevention and management for non-specialists
- Coronary Heart Disease for Primary Care Course online
- ECG workshop
- Heart failure foundation
- Heart failure update
- Hypertension
- Introduction to cardiovascular disease
- Managing heart failure

Communication

- Advanced Communication and Supportive Relationships
- Communication and Consent
- Remote Consultation and Triage for Nurses and AHPs

Consultant Practice

- Mind the gap: transformative learning for consultant practice

Clinical Skills

- Licence access

Dementia

- Dementia management

Dermatology

- Dermatology for nurses and AHPs
- Dermatology Update
- Fundamentals of Dermatology for Primary Care
- Spots Rashes and Skin Eruptions Seen in Primary Care

Diabetes

- Advancing diabetes care
- Diabetes care
- Diabetes course for nurses and AHPs
- Diabetes foundation
- Diabetes update
- Diabetes update day
- Introduction to diabetes
- PITstop (programme for injectable therapies) advanced diabetes course
- Pitstop continuous glucose monitoring (CGM): essentials for primary care to enhance diabetes care

Diabetes (continued)

- PrePITstop diabetes foundation course
- PrePITstop diabetes key message (foundation level) course
- Pre-PITstop foundation update course
- Type 2 Diabetes Demystified

Digital Health

- Digital Skills for Digital Health

Educator Training

- Teaching and Training Skills

End of Life Care

- Care at the end of life
- End of life care and symptoms management
- Grief, loss and bereavement

Frailty

- Care of the Older Person with Frailty
- Community Rehabilitation: Healthy Ageing
- Frailty - assessment, risk reduction and management
- Frailty care
- Interventions for frailty and falls

GP Nurse Update

- GP Nurse Update

Health & Wellbeing Promotion

- Advanced health promotion
- Wild Monday – Work Well Programme and Webinars

History Taking & Assessment

- Advanced history taking and assessment
- Advancing Clinical Decision-Making
- Advancing Consultation and Clinical Assessment
- Assessment of the child in primary care
- Clinical Assessment and Biomedicine for Advanced Practice
- Comprehensive assessment of the older person
- Decision Making for Healthcare Settings
- Diagnostic Reasoning in Practice
- Enhanced Assessment and clinical reasoning skills for clinical practice
- Enhanced Patient Assessment and Management
- History Taking & Assessment

Immunisation & Travel Health

- Annual OVG Immunisation Seminar
- Childhood Immunisations
- Immunisation Training for Nurses & AHPs
- Immunisation update - National cohort Immunisations (Adult/child)
- Immunisation update - travel health
- Immunisation Update (half day)
- Immunisations and Influenza Update
- Introduction to Immunisation
- Introduction to immunisations for the registered professions
- Introduction to travel health
- Tuberculosis (TB), Mantoux & BCG Immunisation Training for Nurses
- UK Clinical Vaccine Network Conference

Independent Prescribing

- Non-medical prescribing update
- Prescribing Safely in Geriatric & Frailty Patients

Interpreting Blood Results

- Interpreting blood results
- Understanding blood results

Leadership Development

- Clinical and Professional Leadership
- Coaching and mentoring in Health and Social Care
- Data Analysis and Interpretation
- Improving the quality of healthcare
- Integrated System Leadership
- Leadership and Management in Healthcare
- Mastering Professional Practice
- Operational Management in Health and Social Care
- Public Health Leadership
- Three step leadership and management

Lifestyle Medicine

- Lifestyle Medicine

Long-Term Conditions

- Chronic Kidney Disease
- Community rehabilitation: long-term conditions
- Diagnosis & Management of Vitamin B12 Deficiency
- Stroke Care

Men's Health

- Men's Health
- Men's Health Day

Mental Health

- Advanced Therapeutic Mental Health Skills for Practitioners
- Managing Mental Health in Non-Mental Health Settings
- Mental Health
- Mental health and learning disability
- Self harm and suicide awareness
- Understanding mental health in primary care

Minor Illness & Injury

- Assessment and Management of Minor Injuries in Primary Care
- Clinical management of minor injury and illness
- Introduction to minor illness
- Management of MSK Presentations and Injuries
- Minor illness update
- Managing minor injuries and minor illness
- Paediatric minor illness: assessment and management in primary care
- Theory and Practice of Minor Illness Management in Primary Care

Musculoskeletal Conditions

- Annual Injection therapy Competency Day
- Cervical Spine & Upper Limb Foundation – Unit 1
- Lumbar Spine & Lower Limb Foundation - Unit 2
- MSK and Chronic Pain
- Musculoskeletal problems in general practice
- Spinal Manual Therapy Masterclass
- Thoracic Spine, Sacroiliac Joint & Advanced Techniques – Unit 3
- Theory & Practice of Injection Therapy Course – Unit 1 & 2

Nutrition and Hydration

- Fundamentals of Human Nutrition

Older People

- Older People and Frailty

Paediatric

- Child and Adolescent Mental Health
- Psychosocial Care of Children, Adolescents and their families
- Risk and Protection of Children

Contents

Public Health

- Communicable Disease and Public Health
- Community Empowerment and Advocacy

Professional Development

- Study Skills for Health and Social Care Professionals

Quality Improvement

- Advocacy and Education for Quality Improvement in Practice
- Advocacy and Evidence Based Practice

Research

- Advanced Research Design
- Applied Research for Professional Practice
- Applied Research Methods
- Applied Research Methods for Advanced Practice
- Epidemiology and Research Methods
- Research Design

Respiratory

- Advancing asthma care
- Advancing COPD care
- Advancing paediatric asthma care
- Asthma foundation
- Asthma paediatric update
- Asthma update
- Bronchiectasis

Respiratory continued

- COPD foundation
- COPD update
- Interstitial lung disease (ILD)
- Introduction to asthma
- Introduction to COPD
- Introduction to paediatric asthma

Sepsis

- Recognising a patient with sepsis

Sexual Health

- Sexual health course for nurses and AHPs

Spirometry

- Advancing spirometry update
- Performing paediatric spirometry
- Reporting paediatric spirometry
- Spirometry performing and reporting
- Spirometry reporting & interpretation the 7 steps
- Spirometry update
- Spirometry: performing only

Contents

Supporting Staff

- Personal and Professional Practice for Patient Safety
- Root cause analysis

Supervision

- Introduction to workplace supervision
- Resilience Based Clinical Supervision
- Clinical Supervision – Training for Supervisors

Urgent and on the day

- Urgent and on the day

Urology

- Urological Care in Primary Care Practice

Weight Management

- Obesity Medicine: Weight Management, GLP-1s and Beyond

Women's Health

- Contraception and sexual health in primary care
- Contraception update
- Essential Contraception following childbirth
- Contraception Course for Practice Nurses
- Introduction to contraception for healthcare professionals
- Gynaecology Assessment & Examination
- Heavy menstrual bleeding
- LARC & IUC removal training

Women's Health continued

- Introduction to Menopause
- Management of the Menopause Certificate
- Menopause foundation
- Menopause masterclass
- Menopause update
- Menopause – Diagnosis & Management
- Pelvic Organ Prolapse and Ring Pessary Management
- SRH Essentials for Primary Care
- Women's Health
- Women's Health for Primary Care Clinicians

Wound Care

- Introduction to doppler assessment
- Introduction to wound care
- Management of venous leg ulcers
- Principles of leg ulcer management
- Principles of wound care
- Wound care update day
- Wound management for nurses and AHPs
- Prevention & Management of Pressure Ulcers

Free CPD Resources

Summary of Acronyms

Meet The Team

Please contact the Primary Care School team if you have a query about any aspect of the courses listed within this brochure. Queries can be directed to our team inbox: england.primarycareschooltvw.se@nhs.net

Team member	Role	Programmes
Prof Chris Warwick	Primary Care Dean	South East
Sue Clarke	Head of School of Primary Care (Training Hubs)	Thames Valley and Wessex
Marie-Clare Wadley	Primary Care Workforce Development Lead	Thames Valley
Abbie Canton	Primary Care Learning Environment Lead	Thames Valley
Victoria Pearson	Primary Care Learning Environment Lead	Thames Valley
Sarah Redhead	Primary Care Learning Environment Lead	Thames Valley
Vivienne Stevens	Primary Care Business Administration Officer	Thames Valley and Wessex
Stephen Ingram	Primary Care Business Manager	Thames Valley and Wessex

Foreword

Welcome to the rich and exciting educational offers for primary care available to Allied Health Professionals, Registered Nurses and Nursing Associates working in Primary Care within Thames Valley.

Facilitating your education and training is important to Thames Valley and Wessex Training and Education, which exists to support the workforce in primary care.

Additionally, the Thames Valley and Wessex (TVW) Primary Care School supports educators and placements for learners in primary care by championing learning and quality of education. Currently over 90% of Primary Care Networks (PCN) in TVW have signed up, or are already approved, as learning environments. Through this activity, we are creating the pipeline for our future workforce.

Please take up this opportunity of CPD and learning as part of your culture of education and development within your practice or PCN.

Professor Chris Warwick
Primary Care Dean
NHS England – South East

What is Continuing Professional Development (CPD)

Continuing Professional Development refers to the ongoing process by which health care professionals maintain, improve and broaden their knowledge, skills and competence throughout their careers.

It is both a registered professional requirement, and a career development tool, ensuring staff can deliver safe, effective and up-to-date person-centred care, aligning with health population needs. All healthcare professionals have a responsibility to identify their CPD needs, and work with their employer to plan how those needs could be met.

CPD can include the following:

- **Formal education – for example, attending accredited and non-accredited courses, conferences, webinars, online learning and training modules and carrying out research.**
- Professional activity – for example, being involved with a professional body or giving a presentation at a conference
- Self-directed learning – for example, reading articles or books
- Work-based learning – for example, reflecting on experiences at work, considering feedback from service users/students, shadowing or being shadowed or being a member of a committee

CPD funding is available for formal education (as described above) and equates to approximately £1,000 per learner, over a three-year period.

Please note, mandatory training does **not** contribute to CPD training hours, unless the training relates to your area of speciality.

Who is eligible for CPD funding

Through NHS England's commissioning, we can support CPD funding applications from Allied Health Professionals, Registered Nurses and Nursing Associates working in Primary Care within Thames Valley.

Personalised care roles, Health Care Support Workers, General Practitioners, Pharmacists and Physician Assistants are not eligible for this CPD funding and should discuss funding opportunities with their employer.

[Frequently Asked Questions \(FAQs\)](#)

Please refer to our FAQ guidance for further information.

CPD opportunities and how to apply

CPD opportunities

You can view our available funded CPD courses within this course catalogue. For courses that sit outside the current offer, or for New to General Practice Fundamentals, Apprenticeships, Independent prescribing and Advanced Practice please contact your Learning Environment Lead, within Thames Valley Training Hub to discuss further.

How to apply for CPD funding

For all funded CPD requests including those sitting outside our current offer, please ensure you read the corresponding information such as course description, delivery method and dates available, and correctly complete and submit the Continuing Professional Development funding application [Microsoft Form](#) (or scan the QR code)

Do not apply directly to the course provider unless otherwise instructed.

If successful in your funding application, you will receive confirmation, application and enrolment details by email from the TVW Primary Care School.

Please inform the TVW Primary Care School if you are unable to attend your funded course at your earliest convenience – Non-attendance will be recorded, relayed to your practice/line manager and future funding maybe affected.

Bloods

[Introduction to Phlebotomy](#)

This is a comprehensive and hands-on course designed for individuals eager to embark on or enhance their journey in the vital skill of phlebotomy. Specifically tailored for those in primary care settings, our course is uniquely accessible to a wide range of participants, from healthcare professionals to individuals with little or no prior healthcare experience, such as receptionists or care navigators seeking to expand their roles. Led by seasoned experts, including a Senior Phlebotomist with over 20 years of experience and a Senior Nurse, this engaging day-long program promises not only a thorough grounding in the theoretical aspects of phlebotomy but also provides ample opportunity for practical, hands-on learning. Participants will leave equipped with essential skills, knowledge, and a workbook to guide their continued development in their professional settings. Join us for a transformative learning experience where you'll gain invaluable skills and confidence in the art and science of phlebotomy.

Dates: please see provider website

Provider: BBO Training

Delivery method: face to face, The Lambert Hotel, Watlington

Level of Study: Introduction

[Managing Blood Results in Primary Care](#)

Our one-day online course covering key topics for managing blood test results in primary care. Ordering and filing blood tests is bread and butter primary care. But are we always as intentional as we could be when ticking the boxes on the request form?...and when results are filed, is there always a clear plan?

Dates: please see provider website

Provider: Red Whale

Delivery method: virtual

Level of Study: Intermediate

Understanding Blood Results for Physiotherapists

This 2-day course provides physiotherapists and allied professionals working with a MSK caseload with the essential background in physiology and pathology for a haematological, biochemical and immunological approach to patient management.

Dates: please see provider website

Provider: M&K Update Ltd

Delivery method: virtual

Level of Study: Intermediate

Understanding Blood Results

Early recognition of abnormalities can avert potential life threatening or at least harmful situations. This 2-day course allows the candidate to fully understand routine haematology and biochemistry results. Attended by nurses and allied health professionals whose work involves blood investigation.

Dates: please see provider website

Provider: M&K Update Ltd

Delivery method: virtual

Level of Study: Foundation

[Interpreting Blood Results](#)

A full-day course tailored for experienced Primary Care staff who seek to enhance their proficiency in 'Interpreting Blood Results within Primary Care

Dates: please see provider website

Provider: BBO Training

Delivery method: virtual

Level of Study: Introduction

Cancer

[Cancer](#)

Our one-day online course is designed to support primary care clinicians to avoid common pitfalls, tackle health inequalities in diagnosis & screening, and personalise care for people living with and beyond cancer. What we cover

Early diagnosis with particular focus on common cancers but also some rarer and more difficult to diagnose ones

Spotting cancers in blood tests

Dates: please see provider website

Provider: Red Whale

Delivery method: virtual

Level of Study: Advanced

[Cancer Care](#)

This module is for healthcare professionals who are:

- interested in extending their knowledge and skills in caring for patients with cancer
- keen to improve their understanding of the issues faced by patients and loved ones with a diagnosis of cancer
- committed to developing their professional portfolio in this area of clinical practice.

Ideally, you should be working in a clinical area that offers regular contact with patients who have cancer. Led by our supportive and experienced staff, this course will cover:

the philosophy of cancer care

- the scientific basis of cancer: epidemiology, aetiology, carcinogenesis, the genetic basis of cancer
- cancer prevention and early detection
- screening, investigations, staging and diagnosis
- disease trajectories
- site specific cancers and metastatic disease
- the social, psychological, emotional, spiritual and cultural context of cancer care
- treatment modalities to include surgery, radiotherapy, chemotherapy, hormone therapies, biological therapies and complementary therapies
- current trends in cancer management and health promotion
- evidence based practice and cancer related clinical studies
- oncological emergencies
- rehabilitation and survivorship
- contemporary issues: e.g. the expert patient, community vs hospital care, cancer inequalities in the NHS.
- health policy and cancer NHS reform.

Dates: please see provider website

Provider: Buckinghamshire New University

Delivery method: face to face, Uxbridge Campus

Level of Study: 20 credits, level 6 or 7 or non accredited

Cardiac

[Advancing Coronary Heart Disease \(CHD\) Care](#)

This course is suitable for anyone who would like to develop their knowledge and understanding of the diagnosis and management of coronary heart disease (CHD). It covers risk factors, assessment, and acute and long-term management of CHD, including blood pressure and lipid management, through lifestyle and pharmacological interventions. The course is built around case studies which help you to put theory into practice.

45 hours course with 4 months to complete

Dates: please see provider website

Provider: Rotherham Respiratory

Delivery method: virtual

Level of Study: Advanced

[Advancing Heart Failure Care](#)

This course is aimed at providing easily accessible, up to date, information on the key issues in heart failure. You will be led through a series of topics that form the essentials of heart failure management and consider aspects of the provision of care in a variety of health settings. The topics are aligned to the recently published heart failure nurse competencies (January 2021) ranging from how to investigate suspected heart failure through to the role of the multi-disciplinary team in facilitating self-care. Learning will be enhanced through a series of case studies that focus on application to practice and consideration of co-morbidities.

45 hours course with 4 months to complete

Dates: please see provider website

Provider: Rotherham Respiratory

Delivery method: virtual

Level of Study: Advanced

Arrhythmia Interpretation and Management

This one-day course provides an opportunity to learn about various heart rhythm disturbances, their aetiology, management and treatment strategies. Delegates must have a good working knowledge of ECG interpretation.

Dates: please see provider website

Provider: M&K Update Ltd

Delivery method: virtual

Level of Study: Intermediate

Atrial Fibrillation

This course is suitable for any healthcare professional who is involved in the diagnosis and management of atrial fibrillation. The course covers epidemiology, pathophysiology, risk factors and diagnosis. It will also cover the management of symptoms, along with the importance of stroke risk reduction in people diagnosed with atrial fibrillation, through appropriate use of anticoagulation.

7.5 hours course with 1 month to complete.

Dates: please see provider website

Provider: Rotherham Respiratory

Delivery method: virtual

Level of Study: Intermediate

Cardiac Disease: Prevention and Management for Non-specialists

You don't need to be a specialist in cardiac care to attend this course but have a desire to learn more about cardiac disease and its management. Unlike the traditional Cardiac Care module there is no requirement to fulfil a book of clinical competencies. If you're looking to enhance your professional development, but don't require credits to put towards a qualification, then you can choose to study this course without credits attached and don't need to complete the final assessment. If you choose this route, you'll receive a certificate of Continuing Professional Development hours which will be valuable for NMC revalidation purposes.

Dates: please see provider website

Provider: Buckinghamshire New University

Delivery method: face to face, Uxbridge Campus

Level of Study: 10 credits, Level 6 or 7

Coronary Heart Disease for Primary Care Course (online)

This course is suitable for any health care professional working in primary care in the field of coronary heart disease (CHD). It offers an opportunity to review current evidence-based practice and apply this to case studies and real-world practice.

7.5 hours course with 1 month to complete

Dates: please see provider website

Provider: Rotherham Respiratory

Delivery method: virtual

Level of Study: Foundation

ECG Workshop

This two-day ECG Workshop addresses the needs of nurses, doctors and allied health professionals who encounter ECG monitoring and traces. Theoretical and practical workshops in ECG Interpretation are delivered by experienced cardiac professionals.

Dates: please see provider website

Provider: M&K Update Ltd

Delivery method: virtual

Level of Study: Intermediate

Heart Failure Foundation

This course is aimed at providing easily accessible, up to date, information on the key issues in heart failure. You will be led through a series of topics that form the foundation of heart failure management, ranging from how to ensure an accurate diagnosis through to tips on self-management and the use of the most appropriate medication regimes. A carefully designed programme of presentations and guided activities will enhance your learning experience supported with opportunities to assess your progress with the use of the 'knowledge check' activities at the end of each section."

15 hours course with 2 months to complete

Dates: please see provider website

Provider: Rotherham Respiratory

Delivery method: virtual

Level of Study: Foundation

Heart Failure Update

This update course is aimed at healthcare professionals with a working knowledge of the management of heart failure who wish to refresh their knowledge and skills. It is based on the latest available evidence and ensures the student is informed of current best practice and recent advances. You will be led through a series of topics to give you the opportunity to review and develop your current knowledge and skills. These will include ensuring an accurate diagnosis through to the rationale for the complex pharmacological and non-pharmacological management options.

7.5 hours course with 1 month to complete

Dates: please see provider website

Provider: Rotherham Respiratory

Delivery method: virtual

Level of Study: Update

Hypertension

This course is suitable for any healthcare professional who participates in the screening, diagnosis and clinical management of hypertension. Often called the “silent killer” hypertension is one of the most important modifiable risk factors for stroke, ischaemic heart disease, heart failure and renal disease. However, according to the World Health Organisation, with early identification, it is one of the most preventable and treatable causes of premature death worldwide.

7.5 hours course with 1 month to complete.

Dates: please see provider website

Provider: Rotherham Respiratory

Delivery method: virtual

Level of Study: Intermediate

Introduction to Cardiovascular Disease

These training days are designed to provide a holistic approach to cardiovascular diseases, encompassing Coronary Heart Disease (CHD), Stroke, Heart Failure, and Hypertension. Participants will gain the knowledge and skills necessary to perform annual reviews for patients with these conditions.

Dates: please see provider website

Provider: BBO Training

Delivery method: virtual

Level of Study: Introduction

Managing Heart Failure

This two-day course explains heart function and basic pathophysiology of heart failure.

This knowledge is then related to the diagnosis of heart failure, and overall management of patients with heart failure.

Device therapy is briefly discussed at the end of the day to increase awareness of treatment options, and palliative care is also briefly explored in order to encourage clinicians to provide patients with opportunities to have early end of life discussions and improve palliative care in heart failure.

Dates: please see provider website

Provider: M&K Update Ltd

Delivery method: virtual

Level of Study: Advanced

Clinical Skills

[Licence Access](#)

Our fully illustrated guides for practical clinical skills procedures have been supporting nurses and other health care professionals in both training and practice for the past 20 years. Over that time, we have grown and expanded what we offer, which now also includes online assessments, checklists and CPD support.

Dates: please see provider website

Provider: Clinical Skills Net

Delivery method: e-learning

Level of Study: Foundation

Communication

Advanced Communication and Supportive Relationships

This single module explores verbal and non-verbal communication, and the development of supportive relationships, within the context of health and social care. It aims to build on existing skills and develop them within the student's area of practice. The module promotes a critical approach to sources of knowledge from nursing, health and social care and psychotherapy.

Dates: please see provider website

Provider: Oxford Brookes University

Delivery method: virtual

Level of Study: 7-20 credits

Communication and Consent

This one-day online CPD starts with a session on what guidance is provided in the Osteopathic Practice Standards (OPS) and other GOsC documents. This will then be followed by a session on best practice in communication skills with Steven Vogel, Professor at the Health Sciences University, who has extensive experience teaching these subjects to undergraduate and qualified osteopaths.

The afternoon sessions include: - a workshop on communication skills with Steven Vogel - a session on issues surrounding communication and consent with children and their parents, presented by Mandy Banton.

This seminar is 7 CPD

Dates: please see provider website

Provider: Health Sciences University

Delivery method: virtual

Level of Study:

Remote Consultation and Triage for Nurses and AHPs

This two-day course will take the participant through the stages of development and practice. Training consists of both theoretical and practical components and will provide the skills required to set up and run a telephone triage system.

Dates: please see provider website

Provider: M&K Update Ltd

Delivery method: virtual

Level of Study: Intermediate

Consultant Practice

[Mind the gap: transformative learning for consultant practice](#)

This 3-day, 10 credit masters level (level 7) unit has been developed based on the definitions and the learning and development of consultant level practice across nursing, midwifery and the Allied Health Professions with a foundation of international literature. The evidence highlights a widespread lack of clarity regarding the purpose and definitions of consultant-level practice. It reveals a distinct gap between advanced-level practice and the transition toward developing consultant-level capabilities. While advanced practice lays the groundwork for clinical expertise, it does not equip clinicians with the necessary skills to evolve into reflexive, transformational leaders within complex systems

Dates: please see provider website

Provider: Health Science University

Delivery method: Blended, Health Sciences University, Parkwood Road, Bournemouth BH5 2DF

Level of Study: 7

Dementia

Dementia Management

This course will cover a range of areas relating to dementia care such as:

- assessment and interventions for patients who have an altered physical status
- altered psychological status and altered social status secondary to dementia
- the concept of patient-centred care in dementia and an understanding of the patient journey to ensure specific needs such as care planning and communication are met
- the roles of relatives, friends, and the extended healthcare team in supporting a patient with dementia

Dates: please see provider website

Provider: Buckinghamshire New University

Delivery method: virtual

Level of Study: 20 credits, Level 6 or 7

Dermatology

[Dermatology for Nurses and AHPs](#)

This one-day course designed to give a broader understanding of anatomy and physiology of the skin and giving ability in recognising lesions, lumps and bumps.

Dates: please see provider website

Provider: M&K Updates Ltd

Delivery method: virtual

Level of Study: Intermediate

[Dermatology Update](#)

This course is relevant for Primary Care staff who wish to update knowledge on dermatology care, including evidence-based practice and guidance.

Dates: please see provider website

Provider: BBO Training

Delivery method: virtual

Level of Study: Update

Fundamentals of Dermatology for Primary Care

The aim of this course is to equip primary care healthcare professionals with evidence-based knowledge and practical confidence to elevate dermatology care, improve patient support for common skin conditions, and ensure appropriate secondary care referral.

Dates: please see provider website

Provider: BBO Training

Delivery method: virtual

Level of Study: Introduction

Spots Rashes and Skin Eruptions Seen in Primary Care

This is a two-day online course. For all practitioners who dread the patient with a rash!! These study days aim to increase knowledge, confidence and competence in consulting patients with skin issues and illness.

Dates: please see provider website

Provider: Aspire Clinical Training

Delivery method: virtual

Level of Study: Intermediate

Diabetes

Advancing Diabetes Care

This course is suitable for anyone who would like to advance their knowledge and understanding of the diagnosis and holistic management of diabetes. It covers different types of diabetes, explains the pharmacological and lifestyle interventions that can optimise outcomes with reference to glycaemic control, blood pressure and lipid management and includes case studies to bring the theory to life. Sections include mental health and special cases such as learning disabilities and the frail elderly.

45 hours course with 4 months to complete

Dates: please see provider website

Provider: Rotherham Respiratory

Delivery method: virtual

Level of Study: Advanced

Diabetes Care

On successful completion of this module, you will be able to:

- demonstrate a critical understanding of the epidemiology, aetiology and pathology of Type 1 and Type 2 diabetes and the impact on the health of the individual.
- critically analyse the therapeutic management of Type 1 and Type 2 Diabetes: Blood Glucose Monitoring, Oral and Insulin therapies.
- critically examine the role of the inter-professional team in the management and care of clients with diabetes in the hospital and community setting.
- critically review the evidence-base for diabetes care and decision making in inter-professional practice.
- critically analyse government strategies for diabetes and examine their benefits for practice within an inter-professional context.
- critically evaluate the physical, psycho-social and cultural impact of diabetes on the client and family.

Dates: please see provider website

Provider: Buckinghamshire New University

Delivery method: face to face, Uxbridge Campus

Level of Study: 20 credits, Level 6 or 7

Diabetes Course for Nurses and AHPs

This one-day course aimed at Nurses and AHPs working in General Practice to develop competency in managing patients with diabetes based around the TREND nursing competency framework

Dates: please see provider website

Provider: M&K Updates Ltd

Delivery method: virtual

Level of Study: Intermediate

Diabetes Foundation

This course is for healthcare professionals who would like to increase knowledge, skills and confidence to provide safe diabetes care. This course provides a “basics up” approach to the complexities of diabetes and will inspire learners to enjoy providing diabetes care. The course has been designed by an experienced practicing clinician who has a passion for improving the lives of those living with diabetes.

15 hours course with 2 months to complete

Dates: please see provider website

Provider: Rotherham Respiratory

Delivery method: virtual

Level of Study: Foundation

[Diabetes Update](#)

This course is designed for clinicians with an existing knowledge of the diagnosis and management of type 2 diabetes. Type 2 diabetes is a condition where complications, including chronic kidney disease and cardiovascular complications, can cause significant morbidity and mortality. The focus of the course is on recognising how appropriate, evidence-based interventions can both prevent complications and reduce the impact of any existing complications on quality of life and the use of healthcare resources.

7.5 hours course with 1 month to complete

Dates: please see provider website

Provider: Rotherham Respiratory

Delivery method: virtual

Level of Study: Update

[Diabetes Update Day](#)

This update course covers the latest trends in diabetes management, encompassing a thorough understanding of cutting-edge pharmacological interventions utilised in diabetes care.

Dates: please see provider website

Provider: BBO Training

Delivery method: virtual

Level of Study: Update

[Introduction to Diabetes](#)

This two-day training is designed for Primary Care staff who are new to the field of diabetes care. If you've recently started seeing patients with diabetes, or are planning to, this course is tailored to provide you with the fundamental knowledge and skills required to confidently care for individuals with diabetes. The primary focus is on adults with Type 2 diabetes, although key recommendations and signposting for patients with Type 1 diabetes will also be covered.

Dates: please see provider website

Provider: BBO Training

Delivery method: virtual

Level of Study: Introduction

[PITstop \(programme for injectable therapies\) advanced diabetes course](#)

This popular, practical 2.5-day advanced course gives multi-disciplinary, practice teams the resources to work towards enhanced diabetes service provision for injectable initiation (type 2 diabetes only).

We recommend PITstop students seek mentorship after attending the course, to ensure they embed the skill safely in clinical practice. This service is normally commissioned with the local community Diabetes Specialist Nursing team.

Programme summary

Revision of diabetes oral medications

GLP-1 Agonists, including initiation using a structured care pathway

Insulin: building the profile

Injection technique

Device workshop

Detective work at review appointments focusing on injectables

Insulin safety (self-directed learning)

When is insulin indicated?

Working through the PITstop insulin pathway to assess for insulin, initiate an appropriate insulin regimen and support the patient for the first 6-months: a case study approach

Changing insulin regimens

Dietary considerations and insulin, including minimising weight gain

Decisions about injectable therapies: a case study approach

Embedding the learning

Dates: please see provider website

Provider: Pitstop Diabetes

Delivery method: virtual

Level of Study: Advanced

[Pitstop continuous glucose monitoring \(CGM\): essentials for primary care to enhance diabetes care](#)

Aims

Understand what CGM is, how it helps, and its limits compared to HbA1c and finger-pricking.

Identify who qualifies for CGM and how to get started

Explore steps for prescribing CGM and educating patients on its use.

Understand how to use and troubleshoot CGM devices like Libre and Dexcom.

Interpret the CGM AGP reports, spot trends, and make treatment decisions.

Explore how to analyse real cases and understand what affects glucose levels.

Explore how to adjust lifestyle or medication based on CGM data.

Dates: please see provider website

Provider: Pitstop Diabetes

Delivery method: virtual

Level of Study: Advanced

[PrePITstop diabetes foundation course](#)

This 3-day multidisciplinary diabetes foundation course focuses on the core diabetes services and care provision for people with type 2 diabetes and prediabetes and emergency management for people with type 1 diabetes. It is aimed at healthcare professionals working in primary care who want to work as a team to improve diabetes services and patient outcomes using structured care pathways.

- Classification and accurate diagnosis
- Diabetes screening for at risk groups
- Day to day living choices
- Encouraging referrals to the Diabetes Prevention Programme and Structured Education
- The oral diabetes medication pathway and related subjects (DVLA, hypoglycaemia, monitoring, concordance, individual target setting)
- Managing illness
- The provision of essential diabetes care using structured care pathways
- Cardiovascular disease prevention, including blood pressure, lipid and kidney management
- Eye screening and diabetes eye complications
- Emotional and mental health
- The foot assessment, foot advice and appropriate referral
- Preconceptual counselling and family planning advice (self-directed learning)
- Case studies: putting it into practice
- Use of audit to improve outcomes

Dates: please see provider website

Provider: Pitstop Diabetes

Level of Study: Advanced

Clinical Assessment and Biomedicine for Advanced Practice

Gain the skills required to assess patients across the patient journey, including knowledge of a wide variety of body systems and disorders. Take a history, complete a physical examination, and communicate your findings using appropriate terminology. With detailed knowledge of biomedicine, alongside findings from your clinical assessment you'll be able to produce evidence-based management plans which aid the patient. On this course, you will delve into various topics such as history taking using widely accepted consultation models to include medical, surgical, and mental health presentations across the lifespan.

You'll gain examination skills for the following systems:

Cardiac, Respiratory, Abdominal, Neurological, ENT, PV, Testicular and Prostate, Breast, Lymph, Ophthalmology, MSK and Dermatology in both adults and paediatrics.

Our study of biomedicine during the course will include the following:

- Anatomy, physiology and pathophysiology of the main body systems
- Biochemistry and microbiology
- Pathogenesis and clinical manifestations of disease
- Genomic and personalised medicine.

You'll be using evidence to understand the benefits and limitations of assessment methods and findings, Linking assessment with diagnosis and management. We will apply concepts in real-world scenarios and enhance your practical skills.

Dates: please see provider website

Provider: Buckinghamshire New University

Delivery method: face-to-face, High Wycombe/Uxbridge

Level of Study: Level 7

Decision making for healthcare settings

Designed for health and care professionals, this course enhances decision-making in complex clinical environments.

Learners will critically examine decision-making theories, risk management, and ethical frameworks. Topics include pattern recognition, uncertainty, and legal considerations. The course supports reflective practice and sound clinical judgement and enables learners to develop their decision-making skills and evaluate their own processes when dealing with rapidly changing situations, uncertainty, and risk.

Leadership Development

Clinical and Professional Leadership

This Clinical and Professional Leadership module will help you gain a systematic understanding of current thinking about the processes of facilitating a culture of collaborative and inclusive leadership within complex public sector organisations.

It aims to help you to integrate the emergent changes in leadership theory within the practice environment and the impact of applying traditional private sector leadership styles uncritically within the public sector organisations.

It explores the relationship between transactional and transformational leadership and evaluates your ability to review, consolidate and extend their knowledge within your leadership role. The module explores how the effects of leadership on clinical teams influence the quality of healthcare.

You will be assessed 100% through coursework. This module can be taken as a standalone module over 6 weeks or as part of a programme of study.

Dates: please see provider website

Provider: Oxford Brookes University

Delivery method: distance learning

Mastering Professional Practice

This Mastering Professional Practice module is designed for postgraduate students who are registered health care professionals. It aims to extend your understanding of professional practice beyond that of competence to one of mastery.

In this module we'll examine the nature of professional practice, including the concepts and theoretical perspectives of your own profession. You'll analyse and debate key theories and issues in the advancement of your professional practice. You'll be able to blend this knowledge with your own experiences to arrive at a new way of knowing and enacting your professional role.

You'll be supported in the enhancement of self-awareness and personal/professional growth through the use of strategies that include reflective practice and critical thinking. You will be facilitated in analysing and debating real issues from your practice, using student-centred learning approaches such as online action learning and online group discussion. You will be assessed 100% through coursework.

Dates: please see provider website

Provider: Oxford Brookes University

Mental Health

Advanced Therapeutic Mental Health Skills for Practitioners

This course is designed for qualified adult nursing staff, and will help you develop your experience and skills to work effectively and compassionately with patients diagnosed or exhibiting mental health symptoms. Led by our supportive and experienced staff, this module will cover:

- principles, and defining mental health and mental disorder
- depression, anxiety and psychosis
- care of the young person
- trauma in mental health care
- substance use and misuse.

On successful completion of the module, you should be able to:

- demonstrate the professional confidence, knowledge and skills required to identify and deliver evidence-based good practice when caring for patients with complex mental health conditions
- critically agree a plan of care that will enable a therapeutic alliance, inform a differential diagnosis and make appropriate referrals to mental health services based on evidence based practice
- develop appropriate management plans for patients diagnosed with mental health conditions/symptoms on the basis of effective person-centred risk/safety assessments and evidence based practice
- communicate effectively with patients with complex mental health needs using the three phase model.

Dates: please see provider website

Provider: Buckinghamshire New University

Delivery method: face to face, Uxbridge Campus

Level of Study: 20 credits, level 6 or 7 or non accredited

Managing Mental Health in Non-Mental Health Settings

This course supports health and care professionals in recognising and responding to mental health needs in general healthcare settings.

There is a focus on decision making that underpins clinical

assessment and treatment of mental ill health. Learners will develop the knowledge and clinical skills required to identify and respond to a mental health presentation and be involved in formulating a safe, evidence based and collaborative treatment plan. Students will critically reflect on how theories of education and leadership impact on leading and managing their teams and services.

Dates: please see provider website

Provider: University of Winchester

Delivery method: hybrid

Level of Study: Level 7

[Mental Health](#)

Our one-day online Mental Health course is designed to give you a range of tools and skills you can use within a 10-minute consultation, and a structured approach to mental health appointments. What we cover

Creating new narratives for a range of mental health disorders - and how to explain these effectively in a way that helps patients to get better

Evidence-based management including therapies and drug dilemmas - everything from psychological therapy to drug-based treatments, self-care and promoting physical health

Bread and butter conditions like depression and anxiety - practical skills we can use with patients, promoting self-care, resources to share and pitfalls to avoid

Recognition and management of other common mental health conditions including PTSD, OCD, eating disorders and perinatal mental health problems

'Microskills' for improving wellbeing like behavioural activation, problem-solving and self-compassion that you can start using with patients the next day

Managing risk and complexity – assessing risk and supporting individuals with complex conditions like bipolar disorder, psychosis, and those at risk of suicide.

[Mental Health](#)

[Mental Health and Learning Disability](#)

This course will support staff to enhance their knowledge and skills in mental health and learning disability care within the Primary Care setting. Day one will have an overview of mental health disorders and appropriate interventions, an introduction to performing annual review for mental health patients. Day two will define and identify a range of learning disabilities and explore their impact on individuals' lives and strategies for support. There will also be an introduction for performing annual reviews for learning disability patients.

Dates: please see provider website

Provider: BBO Training

Delivery method: virtual

Level of Study: Introduction

Self Harm and Suicide Awareness

Course participants will gain a better understanding of patients presenting with self harm and suicidal thoughts. After completion of the course, you will be able to identify risks and assist patients by providing appropriate care and support, referring them to the correct services for ongoing treatment.

This course has a multidisciplinary approach and will be attended by Nurses, Doctors, Allied Health Professionals (AHPs), Healthcare Assistants (HCAs) and anyone who comes into contact with people with Self Harm or Suicidal thoughts.

[MSK and Chronic Pain](#)

Our one-day online MSK and Chronic Pain course is designed to give you a whole new set of skills, and revitalise your enjoyment of caring for patients with long term MSK conditions and chronic pain. What we cover

The science behind chronic pain and why all pain is felt in the brain

Skills to assess pain using a full range of biopsychosocial tools and how you can translate this assessment into supporting patients with self-care

Skills around promoting health behaviour change and patient activation

The 'bad boy' drugs opiates and gabapentinoids and how, when and whether we should be deprescribing

Peripheral, regional MSK issues involving case-based learning: shoulders, elbows, hands, hip, knee, foot and ankle problems

The MSK big three: back pain, osteoarthritis and inflammatory arthritis and ideas to take back to the practice.

Spinal Manual Therapy Masterclass

This one-day course aims to provide clinicians with a great overview of the current evidence base surrounding Manual Therapy and allow students to learn new effective treatment techniques for the Cervical, Thoracic and Lumbar spine.

Manual therapy techniques taught on the course will be 'Musculoskeletal medicine' techniques and students will cover the cervical, thoracic and lumbar regions. There will be case based discussions and students will be encouraged to explore how they would integrate spinal manual therapy into a holistic treatment approach for their patients. There will also be lectures looking at the history of manual therapy, evidence-based practice, critical thinking and the future of manual therapy in physiotherapy practice.

The course is multi-professional, and you will learn in a welcoming relaxed environment, guided by experienced SOMM tutors. The day will be highly interactive and there will be ample opportunities to discuss how the new treatment techniques could be integrated into your day-to-day clinical practice

Dates: please see provider website

Provider: Society of Musculoskeletal Medicine (SOMM)

Delivery method: face to face

Level of Study: Advanced

Thoracic Spine, Sacroiliac Joint & Advanced Techniques

Unit 3

The unit 3 (thoracic spine, sacroiliac joint & advanced techniques) is open to people who have completed both units 1 (cervical spine & upper limb) and unit 2 (lumbar spine & lower limb).

A 5-day unit (4 days plus exam day) covering the thoracic spine and sacroiliac joint, advanced techniques, principles of lumbar injections, and a review of units 1 & 2 in preparation for the Society of Musculoskeletal Medicine membership examination on the final day. This unit can also be valuable as a refresher course for those who have attended our units previously.

Units 1, 2 and 3 provide core training that enables clinicians working in the MSK field to examine, diagnose and treat common disorders accurately and effectively. The units are ideally suited to clinicians working with MSK patients in all settings including hospital out-patients (physiotherapy, rheumatology), sport, general practice, private practice and orthopaedics.

An exam is taken after Unit 3 and this, with completion of a portfolio reflective essay and professional development plan leads to the SOMM Diploma in Musculoskeletal Medicine. The SOMM Diploma is credit rated by Queen Margaret University, Edinburgh, and is worth 60 credits at Master's level.

Theory & Practice of Injection Therapy Course

Our injection Therapy module is endorsed by the Chartered Society of Physiotherapy (CSP). The Theory and Practice of Injection Therapy module is credit rated by Queen Margaret University, Edinburgh, and is worth 20 credits at Master's level.

Reflects the latest MSK practice and evidence in injection therapy. The balance of theory lectures and practical sessions is well-maintained. Each injection technique will be covered in detail with relevant anatomical knowledge, current evidence and clinical guidelines in this field. The module presents an analysis and critical appraisal of the evidence for the appropriate use of injection therapy in MSK practice. It endeavours to encourage students to explore this for themselves during their training and enhance their clinical reasoning skills and critical thinking.

The SOMM Theory & Practice of Injection Therapy course requires access to MSK patients, an eligible supervisor, completion of 10 supervised injections, and is aimed at experienced registered healthcare professionals working in MSK care

This course comprises of Unit 1 & Unit 2, Unit 2 occurs 6 months post completion of unit 1. Total length of course is 5 days (3 days - unit 1 & 2 days - unit 2)

Please note following your funding application you will be required to complete an additional information form to ensure you adhere to CSP, SOMM & NHSE funding requirements. (Funding decision if approved is confirmed from November 2026 onwards)

Nutrition and Hydration

Fundamentals of Human Nutrition

This module will help you understand the basic principles of biochemistry and physiology and why they are essential in the study of nutrition. For this reason, the underlying biochemistry and physiology form the backbone of this module. The main emphasis is on nutrients required by humans, their sources in food in the UK and worldwide. Other aspects covered include the critical assessment of dietary reference values and nutrient intake.

Paediatric

[Child and Adolescent Mental Health](#)

Our half-day online course covers key topics on child and adolescent mental health in primary care. Designed to support primary care clinicians who see and manage children and adolescents with mental health problems, to build their skills in this area. What we cover

Assessing children and adolescents with mental health concerns

Understanding the impact of adverse childhood experiences (ACEs) on mental and physical health

Building skills in the recognition and management of depression and anxiety in children and young people

Some key microskills to support young people while they wait to be seen

Spotting and referring eating disorders

Developing your skills in how to assess and support young people with self-harm

How to talk about and assess suicide risk

Understanding neurodiversity in a CAHMS setting; ADHD, autism and Tourette's disorder.

[Psychosocial Care of Children, Adolescents and their Families](#) **England**

This Psychosocial Care of Children, Adolescents and their Families module opens with a focus on developing psychosocial assessment skills from a sound theoretical basis. It then moves on to explore how using your assessment of family strengths and difficulties can inform planned interventions. A range of therapeutic approaches are introduced and you are encouraged to reflect on their use within your specific practice environment. This module will develop your understanding of the psychosocial needs that are expressed through a child's behaviour and emotions, and your ability to identify and implement ways of managing them.

Dates: please see provider website

Provider: Oxford Brookes University

Delivery method: distance learning

Level of Study: Level 7

[Risk and Protection of Children](#)

This module in Risk and Protection of Children critically examines contemporary childhood from an international perspective with a particular focus on children's experiences of harm in society. You will have the opportunity to understand the legal and policy contexts of child protection and safeguarding work.

The module explores explanatory models for understanding child maltreatment, along with evidence of the signs and symptoms of significant harm to children, including incidence and prevalence rates.

You will be required to critically appraise international research evidence on the risk factors associated with child abuse and neglect. Child protection interventions and responses to child maltreatment will be debated in relation to social and cultural contexts.

Delivery method: distance learning

Level of Study: Level 7

Public Health

Communicable Disease and Public Health

This practice-focused module will enable you to develop a sound knowledge and understanding of the complexity of communicable diseases in the context of Public Health. It is applicable for students working in all healthcare settings. We will examine the history, causes and epidemiology of communicable diseases from a broad public health perspective.

Associated morbidity and mortality, nationally, internationally and globally will be considered together with trends in established and emerging infections. Methods to prevent and control infection will be explored including outbreak management, using surveillance, screening and vaccination strategies. You will have the opportunity to increase your knowledge and understanding of the legal and ethical aspects of public health practice.

You will be assessed 100% through coursework. The module may be taken as a standalone module over 6 weeks or as part over a programme of study.

Dates: please see provider website

Provider: Oxford Brookes University

Delivery method: distance learning

Level of Study: Level 7

Community Empowerment and Advocacy

This Community Empowerment and Advocacy module teaches approaches, theories and tools effective for promoting healthy behaviour within communities.

We will first focus on recognising and addressing sources of bias towards and within communities (both personal and socially generated). We will then show you how to assess the existing needs and resources within social groups and organisations which can be used to support communities in their own development.

We'll evaluate historical and current beliefs surrounding how to effect change, and you will be encouraged to plan a health promotion strategy for a community with a consideration of need, practical planning and ethics.

Teaching is built around the examination of case studies. It draws on examples from history and from present-day practice. These will cover examples where advocacy is used to tackle public health problems originating from a variety of causes.

You will reflect on your learning during the module using a system of structured reflections on your own practice. You will be assessed 100% through coursework.

Quality Improvement

[Advocacy and Education for Quality Improvement in Practice](#)

Throughout this module, learners will develop an understanding of facilitating the A-equip (Advocating and Educating for Quality Improvement) model in practice (NHSE, 2021). This model will support practitioners to deliver a high standard of care through quality improvement processes, staff development, education and leadership to facilitate the wellbeing of themselves and those around them.

Dates: please see provider website

Provider: Oxford Brookes University

Delivery method: distance learning

Level of Study: Level 7

[Advocacy and Evidence Based Practice](#)

This Evidence Based Practice module aims to explore and critique theories, models and strategies for evidence-based practice, with application to the health and social care setting. We will examine the purposes, uses and limitations of various approaches to evidence-based practice, with consideration of political and economic dimensions.

We'll consider the concepts of decision-making from the practitioner, purchaser, provider and consumer perspectives. We will also explore some available tools for critical-appraisal and the transfer of evidence to professional knowledge.

The module will include sharing the work of experts, researchers and the student group for discussion and critique.

Dates: please see provider website

Provider: Oxford Brookes University

Delivery method: distance learning

Level of Study: Level 7

Research

Advanced Research Design

This Advanced Research Design module aims to equip you with skills to find, appraise and utilise research, as well as plan and design a piece of research work. It seeks to prepare you to define a suitable research question and to use this as a basis for identifying appropriate research methodologies for a small-scale research project or dissertation.

This module is designed to enable you to plan and outline a rationale for a piece of primary research, secondary analysis, literature review or audit. It focuses on research as part of a body of evidence used for health and social care practice, and provides an overview of methodologies and methods commonly used in health and social care policies and working environments.

You will be assessed 100% through coursework. The module can be taken as a standalone module over 12 weeks or as part of a programme of study. The module is delivered on campus in the September run and online in the January run.

Dates: please see provider website

Provider: Oxford Brookes University

Delivery method: blended, Headington

Level of Study: 7

Applied Research for Professional Practice

The Applied Research for Professional Practice short course is designed to provide enhanced knowledge of research methodologies for healthcare practitioners. On this programme we'll cover areas such as:

- Appraisal of the sources of knowledge and epistemology concerning the field of practice
- The relationship between knowledge, research, theory and practice
Theories and paradigms of research
- Reviewing literature and the critical analysis of existing research
Generation of new knowledge through the research enquiry, commencing with the development of a research questions and hypotheses
- Developing a systematic literature search
- Different research approaches, designs and data analysis for the chosen topic
(Designing appropriate research)
- Methods of data collection, sample selections
- Reliability, validity and applicability of the research results
- Ethical issues that arise when undertaking research; the role and function of the local research ethics committee
- Statistical analysis of data generated through research and basic software packages for analysing data
- Critical appraisal tools such as CASP
- Presentation, analysis and interpretation of data
- Presentation of research reports and issues involved in writing a research proposal

Respiratory

[Advancing Asthma Care](#)

This course moves beyond the basics of asthma focusing on developing knowledge and skills to enable translation of learning to the delivery of high-quality care in clinical practice.

You will learn:

- How to evaluate the impact asthma has on individuals, local health services and their local community
- Distinguish factors underlying the quality and accuracy of asthma diagnosis
- Create comprehensive, individualised, management plans for a range of patients
- Compare types of asthma and emerging precision medicine therapies
- Apply evidence and guideline-based recommendations to acute asthma management and follow up care in all settings
- Analyse personalised care approaches in supporting patients to self-manage their asthma

Level of Study: Update

[Introduction to Paediatric Asthma](#)

Asthma is the most common medical condition in children and young people; it is vital that all healthcare professionals working with this age group appreciate and understand the diagnostic process and appropriate management options for individual children. This course provides an introduction to asthma in children and young people and will enable healthcare professionals to apply their learning to real world clinical practice. The value of integrated care, and how healthcare professionals in primary and secondary care as well as schools and emergency/ambulatory settings, can work together is explored.

Spirometry

[Advancing Spirometry](#)

The content of this spirometry course will enable learners to confidently perform and report spirometry whilst at the same time providing them the underpinning knowledge to question the diversity of guidance and practice, whether reviewing evidence or peer performance.

The course will prepare delegates for portfolio assessment. Throughout the course learners will collate a reflective learning log which will contain key documents, reflections and understanding required to take the ARTP assessment, but will also enable the learner to appreciate the difference between numerical reporting and clinical interpretation using current, 'real life' anonymised case studies.

45 hours course with 4 months to complete

Level of Study: Advanced

[Performing Paediatric Spirometry](#)

Spirometry is not just for adults - children and young people can also perform spirometry. Understanding respiratory illness at an earlier stage can be vital in maintain health throughout younger years, but also in adulthood. Although the equipment and the test itself do not differ entirely from adult spirometry, there are some key differences those working with Children and Young people need to be aware of to get the most accurate results possible.

The course content follows the Association of Respiratory Technology and Physiology (ARTP) standards for spirometry, which are the gold standard in the UK.

Supervision

Introduction to Workplace Supervision

This seminar is for Allied Health Professionals (Level 6 & above). High quality workplace supervision for healthcare professionals is essential for supporting the development of confidence and capability and underpins patient and practitioner safety. Workplace supervision can support a culture of openness and candour and provide the opportunity to reflect on practise and discuss challenges, with the support and guidance of another professional.

This short course aims to introduce the concept of workplace supervision through exploring the role of the supervisor, the skills and attributes required for effective supervision and introduce theories and models of supervision to provide an evidence base for application in the workplace.

Day**

[Urgent and on the day Primary Care](#)

Our one-day online Urgent and On-The-Day Primary Care course is jam-packed with more than 30 topics and is designed to suit the needs of the whole multidisciplinary primary care team.

What we cover:

- An approach to fever in kids
- Cough in children - Bronchiolitis, croup and viral wheeze
- Breathlessness - Acute asthma and COPD exacerbation
- Ear issues - Otitis media and externa; Sudden hearing loss
- Sore throats
- Back pain - Cauda equina syndrome and spinal cord compression
- Pain when walking - Limp in children; Gout; Cellulitis
- Belly pain - Ectopic pregnancy; Acute scrotal pain; Pelvic inflammatory disease
- Pain when peeing - All things UTI
- Eye issues - Conjunctivitis; Giant cell arteritis
- Rashes - Chicken pox and shingles PEP
- Anaphylaxis and BLS update
- Venous thromboembolism (DVT & PE)
- Delirium
- Bites
- Fits and funny turns in children
- Diagnosis of diabetes in children
- Bacterial meningitis and meningococcal disease
- Headaches
- Dermatology with 'Spot the Rash'.

Management of the Menopause Certificate

The BMS Management of the Menopause Certificate is a complete online education package that enables eligible healthcare professionals to develop the confidence needed to deal with 95% of patients who walk through their door, leaving only the 5% of complex cases to be referred for specialist menopause care.

The Management of the Menopause Certificate comprises six interactive learning modules:

- Assessment of women presenting with menopausal symptoms
- HRT practical prescribing
- Premature ovarian insufficiency (POI)
- Menopause and HRT – health effects, benefits and risks
- Breast cancer
- Abnormal bleeding in perimenopause and postmenopause and unscheduled bleeding on HRT

Dates: please see provider website

Provider: British Menopause Society

Delivery method: virtual

Level of Study: Intermediate

Menopause Foundation

Our half-day online course covering a comprehensive, holistic and evidence informed approach to supporting women through the menopause transition.

What we cover:

- Definitions diagnosis and implications of menopause including the role of FSH
- Shared decision making around choices for managing menopausal symptoms and headlines from the new NICE guidelines
- A pragmatic guide to prescribing HRT, specifics of HRT regimes and troubleshooting
- Approaching and managing bleeding problems on HRT
- Alternatives to HRT
- Managing sexual problems, including the role of testosterone
- Menopause in certain groups, including women with a history of breast cancer, liver disease, premature ovarian insufficiency and endometriosis
- HRT, cognition and dementia.
